Conclusion	23

1. Executive Summary

Vellore Institute of Technology University-Andhra Pradesh is a private University established on November 3, 2016, under the Andhra Pradesh State Private Universities Act. VIT-AP University began functioning at Amaravati, Andhra Pradesh from the academic year 2017-18. Right from its inception the University has carved a niche for itself as one of the fastest growing institutions of higher education in India. VIT-AP offers distinctive education through its Undergraduate, Postgraduate and Ph.D Programmes. Currently, the university have seven schools offering 37 UG, PG and Ph.D. programmes in the areas of Engineering, Sciences, Arts, Humanities, Languages, Business and Law. The campus hosts a cosmopolitan culture with its 13000+ students, 400+ faculty along with 500+ research scholars spread across 26 states of India and 11 foreign countries. The teaching-learning process at the institute prepares students for the future. They are involved in an active process of applied learning with the help of experienced faculty who enable the students to channel their talent and intellect to contribute towards the development and sustainability of society. VIT-AP has obtained the approval of UGC in 2020. As on today, the total built up area of the university is 22,78,000 square ft and continuously developing its infrastructure in the current 100 acres and is highly ambitious to expand its construction in the phase-II of 100 acres. The University is also meticulously working towards internationalization of its campus and also greatly ambitious towards participating in various accreditations and rankings. The university was ranked All India #1 in the emerging state private universities category in 2021-22 and 2022-23 in the outlook *i-care* rankings. The university has also been ranked in the diamond band (A+ category) in the World Institutional Rankings 2023.

2. Preamble

With a history of 37 years of innovation in educational and research domain, VIT has been a forerunner in delivering quality education. Consistently ranked among the top educational institutes in the country, the VIT group of institutions have had a proud tradition of pursuing knowledge and excellence. In keeping with this tradition, the leadership at VIT-AP resonates a dynamic blend of academic initiative and industry partnership with a vision of creating one of the finest academic destinations in the world. At VIT-AP, all programmes have been carefully crafted for a holistic development of the students. VIT-AP offers distinctive education through its Undergraduate, Postgraduate and Ph.D Programmes. The curriculum is designed to build strong fundamental concepts in tandem with applications based on industry requirements. The VIT-AP campus, which is poised to become one of the country's best campuses, offers several avenues to explore student's interests, identify core competencies, and engage in an evolving lifecycle of education and growth. It is a place where:

- ✓ Students are offered immense opportunities to learn, practice, grow, and thrive
autonomous learning is encouraged in order to enable students to chart their own course
- ✓ Students carry out hands on experiments related to programme content in the form of engineering clinics
- ✓ Industrial and international exposure is provided
- ✓ Overall personality development is ensured through sports, clubs and chapters, and cultural activities.

2.1 Vision

We shall transform higher education and contribute to the improvement of life itself by application of knowledge.

2.2 Mission

We shall improve the world through transformative education and impactful research by:

- ✓ Fostering intellectual, empowered, accountable and caring workforce
- ✓ Producing outstanding graduates who are knowledgeable, creative and compassionate
- ✓ Impacting industry and society through innovative and collaborative work

2.3 Motto

Apply Knowledge, Improve Life!

2.4 Core Values

VIT-AP university believes in following the best professional practices and supports all students, faculty and staff to uphold the highest standards of personal integrity, honesty and responsibility. The core values of the university are as under:

- ✓ Student-Centred Environment
- ✓ Transformative Leadership
- ✓ Team work
- ✓ Striving for Excellence
- ✓ Respect and Inclusion
- ✓ Sustainability
- ✓ Creativity
- ✓ Accountability and Integrity

2.5 Quality Policy

- ✓ Develop a system for conscious, consistent and catalytic improvement in the performance of institution
- ✓ Significant and meaningful contribution in the post-accreditation phase of institution
- ✓ Channelize the efforts and measures of an institution towards academic excellence

3. University Highlights

- ✓ First in the country to start Design Your Own Degree (DYOD) programme with options for minors, specializations, and double majors.
- ✓ Offering innovative Curriculum for Outstanding Professional Success (COPS)
- ✓ 500+ doctoral students across all the schools of the university.
- ✓ Collaboration with international universities for student transfer & research.
- ✓ 60+ MoU's with several research labs, startups, companies and training institutes for placements, internships, certifications & research.
- ✓ Well established career development centre to support student progression
- ✓ STARS scheme providing financial assistance to support the advancement of rural students
- ✓ Open access research fund support for publication in Q1, Q2 journals
- ✓ Institutional LMS named VToP for automation of examination and academics
- ✓ Effective mentorship program and counselling centres

- ✓ State-of-the-art laboratories, centres of excellence and central instrumentation facility
- ✓ Campus-wide Networking with Wi- Fi connectivity
- ✓ Well established library with access to academic and scientific print and knowledge resources
- ✓ A/C Seminar Halls, auditoriums, board rooms, gymnasium facilities, playgrounds, student activity centers, food courts, amphitheatres etc
- ✓ Hostel: Clean, well-guarded and secure hostel facilities for boys and girls. The hostels are equipped with convenience stores, night canteen, night library and indoor games facilities.
- ✓ Guest House, Dispensary with Ambulance, Bank with 24 hrs ATM facility and Post Office

The University has set the following key targets for the next 5 years:

- ✓ To implement NEP in a phase-wise manner and provide a platform for multidisciplinary curriculum options.
- ✓ Promotion of DYOD and encourage students to register for minors, specializations and double major options.
- ✓ Increase the research footprint of the university: 4 publications/faculty, target 6000 publications in Scopus and WoS database, increase in the university h-index to 60 and double the number of citations.
- ✓ Increasing the number of granted patents (5 per year) and technology transfer of the granted patents
- ✓ Fetch external research funding of at least 10 crores.
- ✓ Fund generation of at least 10 lakhs through consultancy
- ✓ Nurture incubations and transform them into start-ups

- ✓ To strike a balance between student intake and residential infrastructure
- ✓ Nationwide recognition by participating in accreditation and ranking.
- ✓ Increase the number of UG/PG programmes offered by the university
- ✓ Adopt policies and implement practices towards promoting the sustainable development goals (SDG1, SDG2...)

4. SWOC Analysis

4.1 Strengths

1. Highly qualified and experienced faculty with Ph.D from IIT's NIT's, CFTI's and reputed universities abroad.
2. A unique "Design Your Own Degree" (DYOD) programme offering Minors, Specializations and Double Major options.
3. Enriched and adaptive curriculum: The students are imparted with the principles of human values, ethics, sustainable development goals along with the technical competency.
4. World class infrastructure with the state of the facilities in laboratories, ICT enabled classrooms, student activity zones, fully equipped residential blocks and other service and support facilities.
5. In-house developed software VToP for e-governance in the areas of academic administration, financial management, human resource management, examination automation and other areas of relevance.
6. Cosmopolitan culture with students and faculty drawn from several states across the country and 11 nations.
7. Out-of-classroom learning – guest lectures, seminars, conferences, workshops arranged by the school and participation in such activities.
8. Excellent innovation ecosystem with a comprehensive framework to support and nurture innovation and entrepreneurship among our students. Our initiatives are streamlined to empower young minds, encouraging them to think creatively, take risks, and transform their innovative ideas into viable ventures.

4.2 Weakness

1. The remote location of the University impacts the access to public transport
2. Lack of on-campus residential facilities for the faculty

3. Low international student percentage.

4.3 Opportunities

1. Collaborate with industries for future product development, revenue generation etc.
2. Establishment of centres of excellence and collaboration on the development of real-time applications, creates an opportunity for the students and faculty to obtain experience working in an engineering workplace while still meeting their academic requirements.
3. Strategic partnerships with international universities, research labs and industries
4. Innovation ecosystem and centres of excellence to enhance research foot print. As a result, diversified faculty potential could be tapped to develop wide range of online courses.
5. Socially and economically strengthen the adopted villages

4.4 Challenges

1. To strike a balance between student intake and required residential infrastructure
2. Pooling resources and opportunities for emerging as a teaching and research intensive university of national excellence.
3. Achieving global recognition by participating in international rankings.

Enablers :**Governance Enablers :**

Governance enablers are crucial for fostering transparency, accountability, and decisive decision-making. They guarantee that policies and practices are consistent with the University's mission, promoting effective leadership and active participation from all stakeholders. Enabling quality assurance and continual improvement fosters innovation, academic excellence, and long-term growth. They play a crucial role in adhering to regulatory standards and assuring the University's sustainability.

- The University follows a hierarchical organization with Statutory Bodies such as the University Court, Executive Council (EC), Academic Council (AC), and Finance Committee, which represent many stakeholders. The university envisions the following goals.
- Developed in line with UGC and Ministry of Education guidelines.
- Regular review of IDP progress through a committee.
- Regular monitoring of IDP initiatives to align with stakeholder needs.
- Strengthening administrative processes for smooth campus functioning.
- Assessment of IDP's impact on institutional growth, strategic alignment, and regulatory standards.

Financial Enablers :

- Approach relevant bodies/organizations/entities for sponsorship.
- Partner with industries for sponsored research, innovation, consulting projects.
- Provide practical experience to students.
- Strengthen university's endowment fund.

Academic Enablers :

The curriculum design and development of all the programmes are initiated by defining the course content that caters to the needs of various stakeholders. The study and analysis focused on providing solutions to local and regional needs are imbibed in several courses offered under different programmes, hence providing an opportunity for the students to apply their acquired domain knowledge for addressing the same. The credited project components over the programme duration, leads every student to understand societal needs such as smart agriculture, smart healthcare etc. The curriculum consists of product building activities like Engineering Clinics and few more courses to assist students in achieving skill set required to work in or establish a start-up that could benefit in improvising the socio-economic status. Visit to local industries are also organized to provide an opportunity for students to understand the current

technological know-how and the local market trends. The curriculum also mandates credit-based clubs which integrate the societal and local needs by engineering students in welfare, education and socially responsible activities. The university focuses towards implementing advanced programs such as AI and Robotics, Data Science, Data Analytics, Business Systems etc., Further, the curriculum at VIT-AP is designed to foster entrepreneurial spirit among students. Students are provided opportunity to explore more on the start-up ideas by encouraging them to participate in Hackathons and providing courses such as design thinking, Lean start-up management, etc

Action Points

- Encourage more students to register for double major and specializations.
- Proposal of multi-entry multiple exit courses and academic programs that address futuristic needs of industries and economic development of the country
- To achieve an FSR of 1:15
- Encourage the link of the students with the society/industry during their period of stay in the university.
- Organizing field visits and industrial tours for the students to enhance their understanding of the current trends in the industry.
- Propose strategies to improve teaching-learning, inclusiveness, gender sensitization, social connect among the students
- Introduce courses related to Indian Knowledge System (IKS)
- E-content development: Creating course-based video lectures on institutional LMS, MOOC, on-campus MOOC studio, etc.
- Online collection of feedback from students, alumni, industry experts, faculty members for curriculum development and feedback analysis
- Declaration of examination results within 2 weeks of completion of the semester exams.
- Engage alumni in student recruitment and mentoring.
- Focus on student's creative activities, global exposure, internships, entrepreneurship, leadership and community service.

Research and Intellectual Property Enablers:

VIT-AP considers research as the central theme and mobilizes the available knowledge resources. The emphasis and focus on promoting state-of-the-art research is accorded high-priority by the VIT-AP University. The research culture at VIT-AP aims to apply knowledge and conduct pioneering research to contribute to society in the field of science, technology, and humanities. The institute provides support for a large number of students to get involved in research at all levels of the educational programs. The aim is to enable the active translation of research towards social sustainability, and growth. The scholars at VIT-AP are provided with a unique opportunity to work with highly qualified faculty members and experts from the industry.

The plan for research envisages fostering and encouraging the faculty members to engage into transformational and translational research in order to address the societal challenges confronted by India today, in various pertinent domains. To achieve this, the university has an approved research promotion policy which emphasizes on motivating faculty, providing necessary support facilities, developing and maintaining research equipment and infrastructure. The research facilities are provided at individual school laboratories, centers of excellence and central instruments facility. The central instruments facility is established to support and cater to the research needs of scholars and faculty fraternity. Apart from the high-end research equipment, the university also hosts centers of excellence in the areas of artificial intelligence & robotics, cyber security, and internet of things. These centers contribute to advancing knowledge in these specialized domains. The university also provides access to research journals from various publishers including Elsevier, Springer, IEEE and other prominent research databases.

The university has established well-defined and structured guidelines to promote Quality Research, which encompass the following measures:

- Provide monthly stipends of up to Rs. 31,000 to research scholars.
- Provide an annual research contingency of Rs.10,000 to scholars and faculty members.

Research accomplishments at VIT-AP are headed for addressing problems in critical and key areas to make a significant impact at the national and global level. With collaborations from industry-based partnerships, as well as from national and

international collaborators, our research focuses on translational aspects. Over a brief period of time after its establishment, VIT-AP university has witnessed a significant increase in the number of research publications and the overall citations of the university. The h-index of the university has increased from 5 in 2017 to 38 in 2023. Also, conferences like V-Shodan and V-Samsodh are started in the year 2022 to promote the research culture among the undergraduate students and research scholars. International conferences with collaboration with reputed foreign universities are also organized periodically across various schools. These collaborative conferences provide an academic platform to facilitate an intellectual exchange and conversation between researchers from different parts of the world. The academic research office also conducts quality workshops on research methodology, LaTeX, research paper writing, research ethics and other relevant topics.

Action Points

- Upsurge the per-faculty research publications, university citations and h-index
- Nurture a inter/multi-disciplinary/transdisciplinary research culture.
- Global and international collaboration on niche areas of research of global implication.
- Develop translational research activities that will impact regional, national and global communities.
- Increase in the number PhD's produced by the university.
- Cultivate collaborative and innovative research partnerships
- Promotion and continuation of incentive schemes for publications in very high impact factor journals
- Increase the revenue generated from external funding to 2 crores/year
- Book chapter publications for the papers presented in V-Shodan and V-Samsodh

Innovation Ecosystem Enablers :

Breakthrough research, patenting, licensing, industrial collaboration, business incubation, and collaboration envisage the innovation ecosystem of VIT-AP. IIEC facilitates the researchers to file their patents and explore their research and Sponsored Research cell to inspire the faculty by providing seed funds via RGEMS scheme to kick start their ideas to products and publications. The University has integrated Entrepreneurship and Design Thinking courses into the academic program in partnership with the Wadhwani Foundation. Through this platform annually over 7500+ students are trained, guiding them through the key aspects of idea validation, product design, and business venture formation. Engineering Clinics is a groundbreaking course, unique in the country, is offered to first and second-year engineering students in every semester. This hands-on program focuses on project-based learning, where a diverse group of 5-6 students, representing different programmes, collaborates to select an innovative idea and develop working prototypes. Engineering Clinics labs provide students with the required state-of-the-art equipment and resources that they can use to design, build, and test their prototypes. The program has impressive participation,

with approximately 5000+ students joining each semester, leading to the creation of over 600+ prototypes every semester. As part of this program, a sum of Rs. 10.00L per AY has been designated as seed funding to support the creation of prototypes. In addition, the university has allocated Rs. 5.00L to host the Engineering Clinics Expo every year, where top prototype teams will receive monetary rewards and full reimbursement for their development costs as assessed by industry experts. This initiative has yielded significant accomplishments such as patents, technical paper publications, and opportunities for business incubation.

V-LAUNCH seed funding is a grant provided by IIEC to faculty members for internal. The grant allows a faculty Principal Investigator (PI) to collaborate with research scholars, undergraduate and postgraduate students to identify and develop a product prototype that solves societal problems. Each project can receive a maximum funding of Rs. 2.00L. To date, more than 60 V-LAUNCH projects have been approved, with a cumulative budget exceeding Rs. 102.00L.

University IPR cell supports filing of intellectual property in the form of Patent, Industrial design, Trademark, Copyright, etc. developed by faculty and students. With the successful implementation of above described initiatives, university has filed 476 patent applications with IPO with VIT-AP University as the applicant. The university faculty and students have published 388 patents of which 24 patents are granted. The

entire cost of patent filing process and attorney fees is borne by the university. Further, the university has established Technology Transfer Office (TTO) that facilitates commercialization of IPs. Ecosystem Alliance, VITAP University strongly values the power of collaboration and has strategically formed partnerships with esteemed organizations such as CII, ISBA, AP Innovation Society (APIS), AP Technical Services (APTS), TiE AP, IKP Prime, MSME, IBS Global, Wadhvani Foundation and IIPRD. VIT-AP University has been recognized by the Ministry of MSME as the Host Institute to support business incubation and promote their schemes. This recognition solidifies our commitment to fostering a vibrant ecosystem for startups and innovators. The university has set up an Institution Innovation Council (IIC), in accordance with the Ministry of Education, consisting of both internal faculty and external members from industry and alumni. This council takes an active role in engaging and contributing to all the initiatives mandated by the Ministry of Education.

VIT-AP University's Incubation Centre, VITAP TBI Foundation (VTBIF), a Section-8 company holding NGO and CSR-1 recognition, lays a solid foundation for promoting innovation, incubation, and entrepreneurship within our university. At VTBIF, we actively support faculty and students in their technology-based and knowledge-driven startup ventures, with numerous product prototypes currently benefiting from our center's assistance. Our dedicated space for incubation and product development spans across 15,000 sq. ft. This comprehensive facility includes designated office space, co-working areas, executive offices, a board meeting room, a makerspace, and a recreational zone for leisure. In addition, the registered incubatees are granted access to our advanced COE facilities, specializing in AI and Robotics, Internet of Things (IOT), Blockchain, Cybersecurity, and Rapid Prototyping. Our team of experienced experts and mentors are committed to guiding you through the entire business launch process, from nurturing your initial idea to securing funding and beyond. We also provide mentorship and training programs to help enhance entrepreneurs' skills and knowledge. VTBIF currently supports the growth of four registered startup companies, housing an impressive number of over 26 incubates.

VIT-AP University is steadfast in its mission to cultivate a culture that encourages innovation and entrepreneurship among its student body. Our comprehensive range of endeavors, impactful partnerships, and noteworthy achievements are dedicated to empowering students and nurturing their entrepreneurial

ambitions. By fostering an environment that fuels their aspirations, we are dedicated to paving the way for a more prosperous future that not only benefits individuals but also contributes to the growth of our nation.

Action Points

- Increase in the university IPR, patent grant – patent published ratio
- Cultivate and promote start-ups, innovation and entrepreneurship with the support of NGOs, MSME and CSR-1
- Encourage and ensure more student participation in international events (hack-a-thon, code-a-thon, make-a-thon), etc.
- Increase the amount of internal seed funding for RGEMS and V-Launch projects.
- Support major project grants for research projects through internal funding.
- Conduct mentoring and training activities for appropriate and timely utilization of funds.
- Increase the number of start-up companies and incubates
- Vigorously engage in the process of developing products with the ultimate goal of successful commercialization.
- Organize more mentorship and training programs to help enhance entrepreneurs' skills and knowledge of the students

Physical and Digital Enablers :

Well-planned, aesthetically appealing and well – ventilated comprehensive infrastructure is the striking feature of VIT-AP. The University is spread over 100 acres of land out of which 225108.63 sq.m is the total constructed built-up area. Out of that, 82079.38 sq.m is used for academic activities (classes, labs, library, auditoriums, etc.) and 132676.25 sq.m for hostels. The remaining area is used for co-curricular and support facilities like playgrounds and canteens. University has 82 ICT enabled class rooms, 14 seminar halls (Raman hall @ 120 sq.m, Einstein hall- 174 sq.m, Newton hall 400 sq.m), 50+ laboratories, auditorium, amphitheatre, indoor stadium, 6 hostels, 2 gyms in hostels, research scholar spaces (each 80 sq.m), 3 language labs (each 130 sq.m) cafeterias, night canteen, student activity center (58,640 sq.ft), health care center, guest house, post office, bank, ATMs, community hall, boys and girls waiting halls, stationary shops etc..

The library functions with KOHA and library management software's with RFID technology for issue, return and renewal of library books. The library provides searching tools such as OPAC & WebOPAC for searching library catalogue. Library data can be accessed remotely supporting with RemoteXs software. Currently, the library has 19,734 volumes of books.

University provides uninterrupted IT services with an internet connectivity of 6 Gbps bandwidth. The student computer ratio is 1:4.83. The university has 27 licensed softwares and several open-source softwares installed in various laboratories. Lecturer Capturing system (LCS) is available for faculty to record their lectures. Moot court is available for law school.

Action Points

- Formation of Institutional Development Planning committee to achieve excellence in teaching and research
- Increase the social awareness and community based activities in the adopted villages.
- To strike a balance between student intake and residential infrastructure.
- Provide on-campus residential facility for faculty
- Expanding laboratory spaces with well-equipped equipment and services to cater to needs of students and faculty members.
- On-campus school and day care centre for the toddlers
- Exclusive library building
- Procurement of second-phase of 100 acres land to initiate the expansion and developmental activities

- Creation of a green, educational and recreational spaces
- **University IT Framework Evolution**
 - Design adaptable IT framework for future needs.
 - Ensure data centres, cloud systems, and network infrastructure can accommodate technological advancements.
 - Implement air quality and emission control systems and smart transportation solutions.
 - Implement cloud-centric strategy for storage, software, and services.
 - Establish a robust hybrid cloud system for mission-critical applications.
 - Create smart classrooms with interactive displays, video conferencing, and collaboration tools.
 - Invest in AR/VR labs for immersive educational experiences.

Networking and collaborations Enablers:

VIT-AP university offers an experience of outcome-based education and a well-defined teaching-learning process. Currently, there are students from 11 countries in the university. Over the span of 6 years, the university has established successful collaboration and MoU's with other universities and industries in India and abroad. VIT-AP signed MoUs with Rochester Institute of Technology (RIT), Binghamton University, IUPUI, Birmingham University, Michigan Dearborn University (MDU), Arizona State University for creation of an International Centre of Excellence in Engineering. The university has stepped-up in the following aspects for internationalization:

- Semester abroad program (SAP) is implemented for creating an opportunity to study 2 years at VIT-AP and 2 years overseas for Bachelor's degrees in the abroad university
- Joint Masters-PhD programs in collaboration with foreign universities
- Emphasis on real-world industrial applications and entrepreneurship, Programmes with heavy involvement of Industry and International partners

The university encourages the faculty members to visit top universities for research assignments. Financial support is provided to the faculty members to attend flagship international conferences abroad and represent VIT-AP. This opportunity helps the faculty to meet academically renowned experts and also to create employment/research opportunities for the students and faculty of VIT-AP. Also, the university supports professors to attend conferences in India and abroad. Students are supported to take part in global technical competitions. Increasing Indo-foreign university projects, inviting foreign professors, organizing guest lectures are the targeted areas in improving the visibility of the university.

Action Points

- To achieve at least 1% international student strength by 2028.
- Strategies to make VIT-AP emerge as an Academic and Industry leader in the global arena.

- Improve academic collaborations and connections with foreign universities and industries
- Focus on joint research in the cutting-edge global research areas.
- Increase the admission of students into UG and PG programmes of abroad universities
- Organize collaborative international conferences and workshops with partner universities
- Increase in the number of faculty exchange programs and creating avenues for collaborative international networking and research.
- Provide a facility for the faculty to avail sabbatical

Alumni Engagement

VIT-AP university has produced more than 2000 graduates in the first 3 outgoing batches. The alumni of the university are working in prestigious companies like Adobe, Qualcomm, Bosch. Many of the graduated students have secured admissions in top universities like Texas A&M, Dale Carnegie university, Columbia university, to name a few. The university is aiming at improving/strengthening the alumni network to improve the reputation of VIT-AP.

Action Points

- To register alumni association
- Generating funds from alumni association
- Implement strategies to establish contacts with alumni and engage them in all activities like collaborations, R&D activities, infrastructural and other developments, etc.
- Effective communication of the opportunities to the prospective students
- Implementation and promotion of the following alumni schemes:
 1. NATIVE Scheme -----Name A Tree In VIT-AP Ecosystem.
 2. HEAL Scheme-----Higher Education Alumni Largesse
 3. ABCD Scheme-----Alumni Book Contribution/Donation
 4. ANR Scheme-----Alumni Name on Room
 5. VOW Scheme-----VIT-APian On the Wall of Fame
 6. V2V Scheme-----VIT-APian Then To(2) VIT-APian Now
 7. SAFE Scheme -----Star Alumni Fund for Education

Facilitative Enablers:

The University emphasizes its strength in Human Resource Development, fostering a culture of continuous professional development and skill enhancement, and aiming to create a dynamic, inclusive environment for excellence.

- Aims to strengthen data tracking for improved diversity and inclusivity.
- Aims to support economically disadvantaged and marginalized students through scholarship and endowment programs.
- Strengthens Mentor - Mentee programme in line with UGC guidelines.
- Develops internship and job-focused counselling strategies and hires career advisors.
- Implements leadership skills system for student involvement in team building and teaching-learning.

Conducting periodic data reviews to track progress towards diversity goals.

- Providing career advisors and organizing workshops on interdisciplinary career paths, resume building, and networking.
- Implementing data analytic tools to assess students' holistic skills and promote diversity.
- Improving mentorship program to align with students' academic and professional goals.
- Building a well-established career counselling infrastructure for smooth transition into the workforce.

Recruitment Automation and Talent Management

- Automated application screening for quick, unbiased shortlisting.
- Clear communication at all recruitment stages with real-time updates.
- Encourage faculty roles aligning with professional growth and leadership development.
- Holistic recruitment-to-retirement talent management system.

Concluding Notes

VIT-AP University, Institutional Development Plan (IDP) is a strategic blueprint for growth and transformation, addressing eight key enablers: governance, academics, research, human resources, finance, networking, and infrastructure. The plan is flexible, adapting to emerging challenges and opportunities, ensuring the university remains at the forefront of educational innovation. Through execution, evaluation, and updates, the IDP aims to foster an empowered academic community and contribute to societal advancement.
